```java
 1
 2 public interface ShapeInterface
 3 {
 4     /*
 5      *  a. getArea – describes the area of an object in the class
   hierarchy;
 6          b. getPerimeter – describes the perimeter of an object in the
   class hierarchy.
 7      */
 8
 9     double getArea();
10     double getPerimeter();
11
12 }
13
```
